Giuseppe Maria Barone

Profile

Having graduated in computer engineering, I am deeply passionate about continuous learning and expanding my knowledge in the field of software engineering. I am particularly interested in developing software for mobile applications; for this reason, I have undertaken numerous projects to enhance my proficiency in languages such as Kotlin (including XML and Jetpack Compose) and Dart.

Motivated, creative, and always eager to tackle new challenges, I am committed to expanding my skill set and making positive contributions to company projects.
